

The complete product range

Product catalogue 2020 / 2021

“This is where they are made: simply great knives.”

Professional knives ‘made in Germany’ are durable and reliable, day after day. That is what GIESSER represents. A genuinely good knife is more than a blade with a handle. Each and every one of our products represents the culmination of six generations of expertise in the art of knife-making. Now, as then, we work with a passion for precision, meticulously hand-pick our materials and never stop honing the quality of our knives. Our outstanding industrial manufacturing standards involve manual controls of every single knife. And we are especially proud to be extending the same care to the way in which we interact with our staff: strong, lasting employment relationships are at the heart of our company philosophy. As a provider of apprenticeships, we invest in the future, and our efforts pay off: our apprentices are regularly lauded as the best junior cutting-tool mechanics in Germany. We take this as proof that outstanding quality and sustainable management are enshrined in the DNA of the Giesser family.

GIESSER – knives that last. Industry and catering professionals from more than 105 countries appreciate the reliability of our products. But we do not rest on our laurels. Creating value for our customers is our raison d’être. We constantly expand our product portfolio and are at the forefront of progress when it comes to function, form and the economical use of resources. Such is the duty of tradition.

We are pleased to present to you the latest issue of our catalogue, a splendid selection of new knives and the same high quality you have come to expect.

Hermann Giesser
Managing Director

Hans-Joachim Giesser
Managing Director

“

Our knives are solid,
honest, highly functional
implements for your
everyday needs.

GIESSER
MESSER

Hans-Joachim and Hermann Giesser talk about the history, culture and plans of the GIESSER Messerfabrik knife factory.

Johannes Giesser Messerfabrik. Then as now.

Hermann Giesser (left) oversees the manufacture while Hans-Joachim Giesser (right) is in charge of sales.

“We only make knives that we would love to keep for ourselves.” That is the maxim that underpinned the foundation of GIESSER more than two centuries ago. Today, Hans-Joachim Giesser is quick to emphasise: nothing has changed. He and his brother Hermann are the sixth generation of Giessers managing the traditional knife factory, and they are ready for the future. “We are running an authentic, family-run company that has grown slowly and healthily out of a passion for precision. The knives we create with our 130 employees are honest, solid, durable work tools.” It is plain to see that the two Swabian specialists believe in manufacturing excellent products from high-quality

materials, strive for consistent reliability and have a passion for product development. Their company and family, both deeply committed to their values, grew organically over time:

What started in a small forge in 1776 has become one of the world’s leading suppliers of quality knives and accessories. Every day, more than 8,000 professional knives are produced at the factory in Winnenden. The Giesser product catalogue comprises more than 2,500 forged and stamped knives and accessories for the food processing industry.

Since the early 1980s, the company's global sales have risen sevenfold. Butchers and caterers have sworn by GIESSER knives for decades. "Side by side, year by year," Hans-Joachim Giesser remarked. GIESSER moves with the times and adapts to the needs of its customers.

"Personal contact with our customers is extremely important to us. We seek dialogue and are grateful for criticism, as it allows us to keep improving and advancing our products."

Functional does not equal boring: for several years, the company has been striving to make its knives visually appealing with beautiful designs of excellent craftsmanship.

Top Solid growth requires more employees and new production facilities. In 2016, GIESSER moved to its new, high-tech building in Winnenden-Hertmannsweiler.

“We want our customers to enjoy holding our knives in their hands and looking at them,” the Managing Director says and goes on to explain the future of the Giesser family:

“Our new ‘PremiumCut’ series has stirred emotions. Specialist butchers and five-star chefs all over the world have shared their enthusiasm with us. We are currently exploring ways of producing our knives more sustainably to complement our economical use of resources.” GIESSER has clearly carved out a niche for itself in the food processing

and catering industries. One thing is certain: The 2018 conversion of the old Winnenden factory to a PremiumCut manufacture was both a milestone and a stepping stone to the future.

“We absolutely rely on our long-term industry partners, but PremiumCut also helps us address potential new target groups. Everyone’s cut out for GIESSER knives, we’re sure of that.” The long tradition of the Giesser family remains on a firm growth trajectory.

Top High-quality blade blanks from chromoly steel in more than 2,000 designs.

“When we were kids, we spent a lot of time in the production hall. We were always surrounded by knives! Our parents taught us to respect knives, not to fear them.”

Top Hans-Joachim Giesser at a packing station. His goal: to keep optimising GIESSER's economical use of resources.

Left Product presentation. An attractive appearance and beautiful, high-quality designs are paramount to GIESSER.

“We believe that sustainability is a business virtue. It goes without saying that our production is as environmentally friendly as possible.”

Left Processing and self-sufficiency. Heat is transformed in the engine room.

GIESSER has embraced sustainability on all levels as a fundamental virtue and a part of progressive management. We are committed to recycling resources such as exhaust heat and water in our manufacture. “Our advantage is that we only work with three materials: steel, plastic and wood,” Hans-Joachim Giesser explains with regard to the company’s sparing use of resources. All waste steel is recycled in full; some of it is melted down and reused. We also recycle coloured plastics. Once mixed into black plastics, they become virtually invisible and make excellent handles.

Hans-Joachim Giesser proudly emphasises: “Our methods are at the cutting edge of sustainability.” And he wants to go even further. GIESSER is considering various approaches to optimising its knife disposal system, for example. It will be a long process, but we are tackling the task with confidence and optimism. When it comes to staff management, our guiding principles are loyalty and fairness: wherever possible, we offer permanent employment to our apprentices and guarantee them durable, solid work in the Giesser family.

Left Promoting continuous improvement – Hermann Giesser in a discussion with Adrian Popa (centre) and Patrick Buckel (right).

Bottom Recycling at GIESSER: Once mixed into black plastics, the colourful plastic flakes become virtually invisible and make excellent handles.

Some facts for you.

Johannes Giesser laid the foundation for GIESSER and started the manual production of knives and other cutting tools.

8.000

The GIESSER Messerfabrik produces more than 8,000 knives every day.

Today, GIESSER is one of the world's leading manufacturers of quality knives and accessories. Its customers are mainly professionals from the food processing and catering industries.

A history of success

1776

In 1776, Johannes Giesser laid the foundation for GIESSER and started the manual production of knives and other cutting tools.

1865

Opening and commercial registration of a specialist shop for steel products, including on-site production facilities. After 1934: production of fixed-blade hand knives.

1934

Production of hand knives. The company split into the Alfred Giesser Messerfabrik, which produced machine blades, and the Johannes Giesser Messerfabrik. In 1936, Giesser and Böhler Edelstahl jointly develop stainless blade steel.

1961

The Johannes Giesser Messerfabrik celebrated the opening of its first expansion building.

12

GIESSER produces knife handles in twelve standard colours. The HACCP colour coding allows our customers to distinguish between knives for different departments, shifts or foods.

1050 °C

GIESSER's most durable knives are made from first-class chromoly steel and hardened in a vacuum furnace at 1050 °C. This is one of the world's most advanced hardening technologies.

2.500

The extensive Giesser product catalogue comprises more than 2,500 forged and stamped knives and accessories for the food processing industry.

PremiumCut

Solid designs, precise sharpness and quality workmanship: the new GIESSER PremiumCut series excels at all levels. You only need to look at them to understand our fascination with these impressive tools.

130

GIESSER currently employs 130 members of staff.

(As at April 2019)

1981

The first vacuum hardening plant caused a rapid improvement in product quality. It considerably increased the cutting-edge retention of the knives.

2000

GIESSER continued to expand and optimise its product catalogue, offering the right tool for any cut.

2016

The company moved to its new, high-tech building in Winnenden-Hertmannsweiler.

2018

The old Winnenden factory was transformed into a 'PremiumCut manufactory'.

In the warehouse. Polished blades await processing.

The GIESSER production.
Of knives and men.

From the handle to the blade: our knife factory in Winnenden works with the utmost precision, every step of the way.

Three factors matter when it comes to producing a high-quality kitchen or butcher knife: the basic materials, the hardening method and the final processing.

What is most important, however, are the people behind the product. Every day, they operate our cutting-edge machines and produce more than 8,000 GIESSER knives. The Giesser family consists of 130 motivated employees.

Joseph is one of them. For the past two years, he has been sharpening and testing blades for GIESSER. His work starts at 6 AM. Joseph values the Giesser family as a reliable employer, and he is fully convinced of the products to which his work contributes.

“A knife must be sharp, durable and comfortable to use.”

“I like the tomato knife best. It’s nice and small and handy.” He has given one to his wife, who appreciates it just as much and uses it in the kitchen all the time. With a laugh, he adds: “My wife just loves this knife. And it’s her opinion that counts for me.”

Top GIESSER produces more than 8,000 knives every day. Alex and his colleagues check each of them individually.

Left Focused work at the grinder.
Pascal loves his work and gives it
a hundred per cent.

Pascal completed his apprenticeship with GIESSER before starting full-time employment as a cutting-tool mechanic three years ago. At GIESSER, he has found his calling: "I am working with two grinding robots. This is brand-new technology. Producing knives in this way is special; it's not something everyone can do!"

A true technology aficionado, Pascal is excited about the future of knife production and his own future in the company. Technological progress, the sustainable use of resources and considerate staff management go hand in hand here.

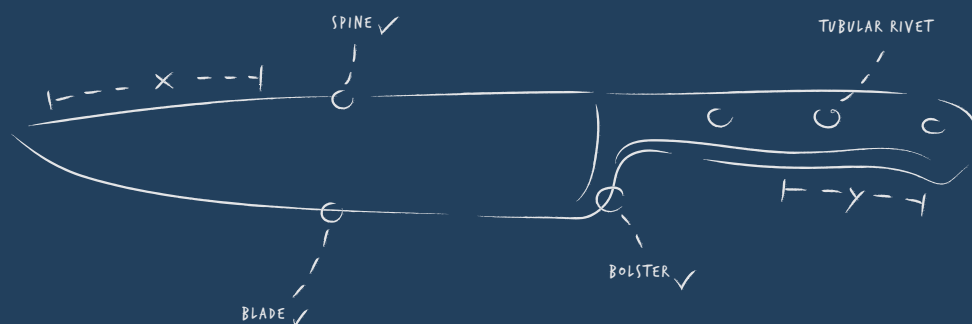

DOMENIQUE
(APPRENTICE)

“A lot of people underestimate my work and think it’s boring. It really isn’t. How many people can say of themselves that they know how to make a knife with their own hands? I sure can.”

Taking traditional values into the future: GIESSER apprentices learn the time-honoured art of knife-making from scratch. It's an indispensable qualification.

Right Dominique at his workbench. He is proud to be learning a traditional trade.

GIESSER is one of Germany's top-rated providers of apprenticeships. Our apprentices regularly receive awards in federal state competitions for young tradespeople. That's no coincidence: our training concept merges tradition with progress. We teach every step of the traditional art of knife-making in depth. Only after mastering those essential skills do apprentices proceed to the production facilities, which operate state-of-the-art machines and robots today. Dominique, a final-year apprentice

cutting-tool mechanic at GIESSER, appreciates the foundation training: "It is an incredibly exciting profession. I learn a lot about craftsmanship and get to make my own knives." Dominique's favourite item is a pocket knife which he produced during his apprenticeship. After his examination, he will possess a certified wealth of knowledge that qualifies him to operate the production facilities. Technological progress on a traditional foundation.

Sharpened steel.

How professional knives are made.

MATERIAL

The blade blanks are stamped out of first-grade chromoly steel, which offers excellent cutting-edge retention.

VACUUM HARDENING

To achieve the best possible cutting-edge retention, blades must be hardened evenly. We use one of the most advanced hardening technologies in the world: vacuum heat treatment.

SHARPENING

The machine automatically pre-sharpens the blades with great precision. Two additional sharpening processes are required to achieve the perfect degree of sharpness.

POLISHING

Our polishing machine bestows shine and lustre on the blades. It makes their surface perfectly smooth. This improves the quality of the blades, making them rust-proof and easy to clean.

HANDLES

We have the best handle for any application. Perfect ergonomics and anti-slip properties are our greatest priority when it comes to handles. Colour-coded handles improve hygiene standards in the food-processing industry.

MANUAL FINISH

We manually finish our blades for perfect, long-lived sharpness. Our etching signals outstanding quality.

Steel and handles.

Our painstakingly hand-picked materials make GIESSER knives true masterpieces.

CHROMOLY STEEL

The steel GIESSER processes is produced in Germany, Austria and France. Virtually all knives are made from high-alloyed stainless steel.

It consists of the following main components:

CARBON (C)

influences sharpness and cutting-edge retention, proportion: 0.5–0.6%

CHROMIUM (CR)

improves the rust resistance of the steel, proportion: 14%

VANADIUM (V)

boosts material stability, proportion: 0.1–0.2%

MOLYBDENUM (MO)

improves the rust resistance of the steel, proportion: 0.5–0.8%

PRIMELINE

Soft handles keep you from tiring while you work. They are easy on your joints and boost your productivity. The solid hand guard protects your hands from sliding into the blade. PP core, TPE coating.

TPE

A thermoplastic elastomer with excellent anti-slip properties.

PP

Our alternative handle material: polypropylene reinforced with glass fibre.

OLIVE WOOD

Olive wood feels warm and pleasant in your hand. At the same time, it is extremely hard and repels moisture. From strictly controlled forests and growing regions. FSC-certified.

PSU

This especially resilient material can withstand temperatures of up to 200 °C (for a short time). It is a plastic specially developed for the food-processing industry.

KOTIBÉ

Kotibé is a highly resilient, hard wood. Its natural texture allows you to hold the handle securely even when it is covered in grease or water. From strictly controlled forests and growing regions. FSC-certified.

POLYOXYMETHYLENE

Polyoxymethylene is a highly stable, durable plastic. The triple-rivet plastic handle offers a secure grip for any professional kitchen tasks. It is compliant with the German Consumer Goods Ordinance for Food, of course.

HVI: LIGHT PURPLE

The knife handle is made from polypropylene, a specially developed plastic that is free from animal substances. It is ideal for vegan, allergen-free cooking. Similarly, it can be used in environments that produce halal food.

DET

The handle consists of plastic mixed with metal particles. This makes the material detectable. Knives with DET handles reduce process risk in meat processing.

“We spent a lot of time tweaking these product lines before they were perfect for their specific fields of application. They’re absolutely flawless now!”

Our favourites.

GIESSER produces more than 2,500 types of knives. Each of them has its unique strengths and is an indispensable part of our product range. Three product families have become our absolute favourites, and we have honed them to perfection: our PremiumCut knives have great designs and lots of personality, while BestCut knives are unparalleled in quality. The PrimeLine series offers innovative kitchen and industry knives.

PREMIUMCUT

For all professionals, cooking enthusiasts and
barbecue lovers who like a touch of class.

Page 32

BESTCUT

Extremely sharp knives with ergonomic handles
and extraordinary cutting-edge retention.

Page 34

PRIMELINE

Perfect for any work in the meat processing
and catering industries.

Page 36

Impressive! Solid knives of outstanding quality with special designs for barbecue lovers, star chefs and steak connoisseurs.

Our most passionate range: PremiumCut

“The feedback from our customers has been overwhelming. Meat sommeliers everywhere are impressed by PremiumCut. We’ve nailed the trend!”

A striking design and the touch of a true expert make the knife creations in our PremiumCut series what they are. The machete idea came from a seasoned professional: Ralf Jakumeit, the “rocking” celebrity chef. With his help, we worked meticulously on every single detail, from the sturdy blades to the extraordinary handle design.

These knives are a sight to behold and a pleasure to handle, whether you’re a professional or a hobby chef. We offer four handles to combine with the ten blades. All of them are made from carefully selected materials, such as Thuja wood or Micarta.

For barbecue lovers and
classy connoisseurs:
PREMIUMCUT.

1 THE BLADE

The blades in our PremiumCut range are extraordinarily sharp and hard – for perfectly precise cuts.

2 THE HANDLE

Strikingly beautiful materials, such as arborvitae wood and Micarta, give our knives their inimitable appearance.

3 ROCKING CHEFS

“Rocking Chefs” are chefs who are open to the extraordinary and keen to take experimenting to extremes. The naturally elegant Micarta is perfect for them: no two handles are alike.

The masterpieces among our chef's knives. BestCut knives offer top quality, absolute precision, excellent cutting-edge retention and indestructible rust resistance.

The perfectionists: BestCut

Forged from a single piece of steel, enriched with large amounts of carbon (X55) and vacuum-hardened to HRC 56–57: our BestCut knives slide through any material safely and without slippage. Their special cut can penetrate even the hardest peels and crusts. To ensure optimal handling of our ergonomically shaped handles,

we have chosen a velvety finish for the surface with excellent grip. BestCut knives meet the highest requirements. Three stainless-steel rivets securely hold the two grip plates together. Their especially resilient material can withstand temperatures of up to 200 °C (for a short time).

1 THE SERIAL NUMBER

Unique and consecutive. A quality seal that allows us to identify and track our products and offer our warranty.

2 THE HAND GUARD

Its slightly rounded edges and oblique shape make for perfect handling.

3 THE HANDLE

With its ergonomic shape and soft edges, each of our handles is a true pleasure to (be)hold.

The long cutting-edge retention of our BestCut X55 blades

— BestCut X55 blade
- - - Conventional blade

A sturdy companion for any task in private and industry kitchens. Perfect for everyday use.

Our most innovative range: PrimeLine

Professionals in the catering or food processing industry require perfectly sharp, hygienic, safe and reliable knives. In short, they need our innovative PrimeLine series. A wide range of blades with various shapes and lengths, sturdy or flexible blades and short or long hand guards make PrimeLine the ideal choice for any type of catering or meat processing task. We have paid particular attention to the perfect balance and

proportions between the blade and the handle to prevent fatigue while cutting. The rounded handles, all with guard, ensure that PrimeLine knives are pleasant to hold and are easy on your tendons and joints. Made from soft plastic, the handles adapt to the shape of your hand. They offer brilliant stability and precision even when your hands are damp.

Meat, fish, fruit, vegetables
– PrimeLine knives deal with
them all.

ARTICLE NUMBER

Our article numbers contain all necessary information on the knife. When you place an order, please pay attention to the additional code numbers and letters that indicate its colour, handle and cut.

2005 ww1 20 g

Model	Handle	Cut	Length	Colour
—	—	—	—	—

SHARPENING

GIESSER offers the perfect cut for any circumstance. You can also choose from a wide range of blade shapes and lengths.

AW PARTIALLY SERRATED

The 4 cm serration can cut through the toughest plastic sausage casing.

W WAVY-EDGED

The wavy blade securely and effectively cuts through hard shells and crusts.

WWL SCALLOPED

A knife with a scallop-sided blade slides through any material easily. It cuts efficiently with minimal effort.

Z SERRATED EDGE

For cutting fruit and vegetables with skin or a harder peel. The blade effortlessly cuts through peel without squashing soft or delicate produce.

Security and hygiene are paramount wherever food is processed.

The colourful world of GIESSER products.

GIESSER uses HACCP colour coding to help customers distinguish between knives for different departments, shifts or foods. Our hygienic knife boxes in various sizes also facilitate separation by department and protect the knife as well as its owner.

Possible allocation

COLOUR CODES BY DEPARTMENT

COLOUR	DEPARTMENT
 RED	Beef
 YELLOW	Pork
 GREEN	Lamb

COLOUR CODES BY SHIFT

COLOUR	SHIFT
 RED	1st shift
 BLUE	2nd shift
 YELLOW	3rd shift

Our suggested allocation

COLOUR CODES BY DEPARTMENT

COLOUR	DEPARTMENT
 WHITE	Bakery and dairy
 YELLOW	Cooked food
 RED	Raw meat
 BLUE	Raw fish
 GREEN	Fruit and vegetables
 BROWN	Root vegetables

COLOUR	DEPARTMENT
 LIGHT PURPLE	Halal processing
 LIGHT BLUE	as needed
 LIME	as needed
 ORANGE	as needed
 PINK	as needed
 PURPLE	as needed

Top The consistent adherence to HACCP combined with hygienic plastic cutting boards in corresponding colours inspires confidence in customers and consumers.

1 DEVELOPMENT

Experienced toolmakers, product designers and our own customers help us develop new handle shapes for even greater security and productivity at work.

2 HYGIENE

All colour-coded handles comply with the applicable hygiene and security regulations.

3 CATALOGUE

GIESSER offers the largest catalogue of colour-coded handles. The coloured dots next to the individual articles indicate serial availability.

4 CUSTOM-MADE KNIVES

Have you set your mind on a knife that is not available in the standard colour you need? GIESSER will custom-make your perfect knife as a minimum batch of just 60 items.

5 CUSTOMISED COLOURS

If you order 2,000 items or more (5,000 items in case of customised knives), we can produce your knives in customised colours (e.g. your company colour or as promotional gifts).

6 QUALITY

We carefully control all process steps to guarantee the consistently high quality of our products.

Butcher knives

STANDARD HANDLE

A standard plastic handle made from anti-slip material for safe, comfortable handling (TPE).

046 – 054

SCALLOPED

A knife with a scallop-sided blade slides through any material easily. It cuts efficiently with minimal effort.

055 – 057

PRIMELINE

The two-component soft handles keep you from tiring while you work. They are easy on your joints and boost your productivity.

058 – 061

NO. 4

A handle made from anti-slip material for safe, comfortable handling. The open end of the handle makes it easy to switch quickly from the standard grip to the underhand position.

063

SCANDIC

An extended hand guard for greater security. The especially long, medium-volume grip ensures perfect handling, especially for users with larger hands.

063

NO. 9

A handle made from anti-slip material for safe, comfortable handling. The open end of the handle makes it easy to switch from the underhand position to the standard grip.

064

EAGLE

Especially pronounced hand guard. Prevents the leading hand from sliding and provides greater security.

065

BODYGUARD

A protective ring prevents the leading hand from sliding off the handle while cutting. Medium-volume handle.

066

NO. PP7

This handle offers optimal grip and is ideal for preventing fatigue during work in the meat and fish processing industry and other food processing fields.

067

DET

The handle consists of plastic mixed with metal particles. This makes the material detectable. Knives with DET handles reduce process risk in meat processing.

068

Standard handle

1 SAFETY

The protective guard prevents the hand from slipping when holding the knife.

2 ERGONOMICS

Average-size handle made from material that offers excellent slip resistance and is easy to grip.

MULTI-FUNCTIONAL

The standard handle is suitable for almost all applications.

Kitchen knives

BESTCUT

This especially resilient material can withstand temperatures of up to 200 °C for a short time.

072 – 074

BESTCUT OLIVE WOOD

Olive wood feels warm and pleasant in your hand. At the same time, it is extremely hard and repels moisture.

075

FORGED CHEF'S KNIVES

A range of traditionally forged cooking knives with a POM handle. Available in many colours.

076 – 078

WOODEN HANDLE

Its natural texture allows you to hold the handle securely even when it is covered in grease or water.

079 – 081

POM HANDLES

The triple-rivet plastic handle offers a secure grip for any professional kitchen tasks.

082 – 083

PRIMELINE

The continuous, red core gives the handle stability. Its coating is made from extra-soft plastic.

084 – 087

STAMPED COOKING KNIVES

A standard plastic handle made from anti-slip material for safe, comfortable handling (TPE).

088 – 098

LIGHT PURPLE

The knife handle is made from polypropylen, a specially developed plastic that is free from animal substances.

099 – 100

PASTRY KNIVES

Our versatile baking and bread-making tools cover all your baking needs.

101 – 105

CHEES KNIVES

The right products for all shapes and types of cheese.

106 – 108

FISH KNIVES

From cod filleting knives to lobster crackers: GIESSER offers a wide range of fish processing products.

109 – 113

PREMIUMCUT

Turn each cut into an experience. We care about knife handles and their finish just as much as we do about our blades.

114 – 125

STEAK CUTLERY

GIESSER steak cutlery is ideal for grilled meat and crispy crusts.

126 – 127

BestCut

The silky soft handle fits particularly well and securely in the hand. The handles are firmly connected together with 3 stainless steel rivets.

The material is particularly durable and can even withstand temperatures of up to 200°C. (short-time contact).

1 THE BLADE

The blade combines extreme sharpness, durability and rust resistance.

2 SERIAL NUMBER

For allocation, tracking purposes and guarantee.

3 THE BOLSTER

Slightly rounded edges and bevelled towards the front to ensure perfect handling.

4 THE HANDLE

Ergonomic design with soft edges, perfect grip to ensure precise guidance, made of plastic specially developed for the food processing sector.

Forged chef's knives

1 THE REFINEMENT

In eight steps the knife is smoothed to perfection. The honing by the hand of a master craftsman guarantees a perfect blade.

2 THE FORGING

From high grade chromemolybdenum steel the forged blank blade is manufactured in nine procedures.

3 THE HANDLE

For the forged cook's knives only high grade POM plastic scales are used.

Light purple

Where food is being prepared, particular attention needs to be paid to safety and hygiene. The HACCP range was extended by adding a knife with special light violet handles for preparing vegan, allergen free and halal dishes, thereby responding to current developments in the food industry.

1 SAFETY

Colours support and complement your hygiene concept in food processing. Ideal für die vegane, allergenfreie und Halal-Gastronomie

2 MATERIAL

Polypropylene without any additives that could be derived from tallow/lard.

PremiumCut

Arresting design, unbelievable sharpness and perfect workmanship combine to make this new knife series something very special. A first glance is all it takes for sparks to fly – you'll be fascinated by these tools in no time.

High-quality chrome-molybdenum steel, tempered to a full 57 HRC, then finely polished and finally sharpened by a master craftsman, guarantees long-lasting enjoyment.

To complement the ten different blades, we offer a choice of four different handles made from carefully selected materials. Together with our extraordinary blades, they make for particularly valuable masterpieces.

High-quality blades are just the beginning: Now, we turn our full attention to extraordinary handle variants. Carefully selected materials, such as White Cedar or Micarta, complement the perfect quality of the blades – making GIESSER knives true masterpieces.

THUJA – TREE OF LIFE

Tradition meets perfection. White cedar burl wood makes our Tree of Life handle a cut above. White cedar – also known as arborvitae or “tree of life” – has an extremely tough burl that makes using the knife an absolute pleasure. A handle of exceptional quality.

RED DIAMOND

The impressive design gets our hearts pumping. Red Diamond takes your breath away: the special manufacturing process creates one-of-a-kind plastic handles, each one unique. Fire, meat and Red Diamond – what could be better?

SPICY ORANGE

One look is enough to heighten all your senses and get ready for cooking. Exotic fragrances and spices mingle – you are one with your knife.

ROCKING CHEFS

Rocking Chefs are tough guys with a soft core: Micarta, a natural material. No handle is like another, making you a true hero of the kitchen. “Rocking Chef” Ralf Jakumeit would go through fire for his absolute favourite!

Service

CLEANING

Look after your knives to protect their outstanding GIESSER quality for many years.

170 – 171

SHARPENING

Absolute precision: our sharpening recommendations.

172 – 173

KNIFE MANAGEMENT

Improve your product safety, work processes and cost controlling.

174 – 175

PERSONALISATION

Give the perfect gift with an individual engraving.

176 – 177

How to make your Giesser knives last as long as possible:
tips on looking after your knives.

Cleaning and storage

Our knives with a plastic handle are dishwasher-proof. We nonetheless recommend that you clean them by hand to prevent staining and the build-up of extraneous rust, and to protect the cutting edge of the blade. After cleaning, keep your knives safe with protectors and by storing them in our knife blocks or Gastronorm tray insets. We also offer a wide range of knife bags, cases and boxes to help you transport your Giesser knives safely.

OUR GUARANTEE

All GIESSER knives with plastic handles are made entirely from materials that comply with the German Food and Commodities Act (LMBG).

KNIFE CARE

1 STORAGE

Store your knives in a dry, secure place. Never leave them lying around near children.

2 SAFETY

Giesser knives are very sharp. Be careful when cleaning, drying and handling their blades.

3 SHARPENING

Regularly sharpen the blade with the honing steel or a fine whetstone. This maximises the useful life of the cutting edge and keeps it sharp.

4 CUTTING BOARDS

Use a cutting board made from wood or plastic. Marble and granite boards damage the blade.

5 HANDLES

Our plastic handles are very low-maintenance. Wooden handles benefit from occasional treatments with suitable oils.

Have a look at our website for more information:
www.giesser.de

Looking after Giesser blades: regularly sharpen and hone the blade to keep it sharp – day after day and for many years to come.

Sharpening

Professional cooking and butcher knives have to withstand a wide variety of mechanical stress. All working environments are different, and no two cuts are alike. High mechanical pressure and varying foodstuffs have a corresponding impact on the blade. You can prevent wear by sharpening your Giesser knives regularly to protect their sharpness and their cutting-edge retention. All you need is a little practice and the right sharpening tools.

BECOME A SHARPENING EXPERT

Our sharpening seminars teach you how to sharpen and hone your hand knives using a honing steel, whetstone or a sharpening machine. Find out about the seminars on our website: www.giesser.de

Sharpening machines are additional methods to honing steels and whetstones. Like the manual tools, they protect the sharpness and the cutting edge of your knives. Find out more about our machines on page 152 or in the service section of our homepage.

INCORRECT

An obtuse cutting angle leads to quick blunting of the cutting edge.

INCORRECT

Blades ground too thin (hollow grind) may chip even at minimal strain.

INCORRECT

Grinding the blade into a straight wedge shape reduces cutting-edge retention considerably.

CORRECT

The perfect blade: its slightly convex edge ensures both, sharpness and stability.

Honing steel

Just a few even strokes on a traditional honing steel will usually restore the sharpness of any blade. But different blades require different stroke techniques. Always slide the knife over the steel in a cutting motion at an angle of 15–20 degrees. Alternate between the left and right side, keep your wrist relaxed and move in a wide arc. The force with which the knife should be pressed against the steel depends on how worn the blade is. Do not use any pressure for a new, unsharpened blade, little pressure for a slightly worn blade and a lot of pressure for a heavily worn blade.

Whetstone

A whetstone allows you to sharpen even the bluntest knives from scratch. It achieves results where a honing steel fails. We recommend using combination whetstones with a fine grit side and an extra-fine grit side. Use an angle of 15–20 degrees, as you would with a honing steel. First, whet both sides of the blade on the rougher side of the stone by guiding them across the stone alternately and evenly. Afterwards, use the finer side to smooth the blade.

Organisation is key! MEMSYS improves your product security, boosts your work processes and helps you control spending.

Knife management

1 INDIVIDUAL LABELLING

Your Giesser knives can be labelled with sequential serial numbers upon request. This system gives you complete, transparent insight into their useful life from production to utilisation and disposal. We also offer customised labelling for companies.

2 MEANINGFUL HANDLE COLOURS

Colour-coding your knives is an excellent way to assign them to different processes, departments or shifts. Giesser offers twelve handle colours as a standard. We are happy to provide you with individual or company-specific colours upon request.

3 CONTROL

Each new knife's serial number is entered into the management system and assigned to the employee the knife is issued to. This makes it easy to monitor sharpening and maintenance intervals. New knives are only issued when a used one is returned; the condition of each used knife is verified upon its return.

4 DOCUMENTATION

To ensure process security, MEMSYS supports seamless, permanent documentation that can be managed easily in Excel. This allows the user to analyse individual wear, current requirements and the exact cost involved. Veterinarians and auditors require such documentation within the scope of IFS certification.

Tool-Check

The one-stop program to manage, personalise and control tools and equipment.

Find out more: www.giesser.de/english/News/Downloads/Brochures

Knife management has become an indispensable part of the food processing industry and its various certifications. Giesser's 'Tool Check' software manages your tools and staff and even offers data analysis. This allows you to identify the user of every single knife. Your employees feel greater responsibility for their knives and handle them more carefully, helping you save expenses. No specialist IT knowledge is required to operate this self-explanatory program. Thanks to its web-based interface, Tool Check stays updated on its own without any complicated steps on your part.

Giesser knives have personality.
A customised engraving turns them
into special, unique gifts.

Your very own knife.

“Good knives have a long life. We use them every day and they are always in sight. This makes them perfect gifts and brilliant advertising items.”

A tangible message – literally: use our personalisation service to create knives with a personal message for your family, friends or business partners. We offer laser inscriptions even for single-item orders. You get to choose whether your engraving is placed on the front or back of the knife. For orders of 250 items or more, we can also print your message on the knife handles in one or multiple colours. Of course, we also offer optimal packaging for any knife or knife set: wooden or cardboard boxes, with or without a cover print, you name it.

1 BLADE INSCRIPTIONS

Subtly stylish: have your own or your customer's company name written on the blade of a quality knife. Please get in touch to discuss the available options.

2 EMBOSSED HANDLE

Visuals on the handle of a knife are a special eye-catcher. Upon request, we also offer this service in your personal company colour.

3 PACKAGING

Our service also includes individual packaging design. We will be happy to talk about your own ideas and requirements.
